Career Objective:

As a Junior MERN Stack Web Developer and a journeyman of JavaScript with the knowledge of Front-End Technology React & Firebase and Back-end technology Node, Express & MongoDB, I can do nothing much but have the ability to make a website functional and operational.

Skills:

- **Programming Language:** JavaScript (Comfortable), ES6 (Comfortable), C (Comfortable), Python (Basic)
- **Front end:** React (Expert), TailwindCSS (Comfortable), Firebase (Comfortable), Bootstrap (Basic)
- **Backend:** Node js (Comfortable), Express js (Comfortable)
- **Database:** MongoDB (Comfortable)
- **Tools:** VS Code, Netlify, Vercel, Surge

Projects:

1. NiyeJai Dot Com (Parcel Management System using MERN Stack)

[Production](#) | [Frontend](#) | [Backend](#)

(November 2023 – Present)

An online parcel management platform where people can book a parcel to delivery, admin can assign delivery man; delivery person can deliver the parcel. User can register as user or as a delivery man.

Key Features:

- Role based different dashboard routes for account holder
- Authentication and authorization handler using firebase and jsonwebtoken (jwt)
- User payment system using Stripe

Technologies: React, TailwindCSS, daisyUI, firebase, jwt, TanStack Query, Axios, react-hook-form etc.

2. Foodbuzz (Restaurant Management Website using MERN Stack)

[Production](#) | [Frontend](#) | [Backend](#)

(November 2023)

Online restaurant management systems where user can order food, add new food but cannot order own added food. User can see order history and added food list also can see single food details.

Key Features:

- Search functionality in backend and pagination in all food page
- Framer motion and lottie react used to display loading animations
- Authentication handler using firebase and jsonwebtoken (jwt)

Technologies: React, TailwindCSS, daisyUI, firebase, jwt, Axios, React Fast Marquee, Sweetalert etc.

3. Root Commerce (Brand Shop Website using MERN Stack)

[Production](#) | [Frontend](#) | [Backend](#)

(October 2023 – November 2023)

User can see all items based on brand and item details upon login. User has the ability to update information of a product add to cart an item and update the cart.

Key Features:

- Dark mode implemented for website
- Authentication added using firebase for user login
- Sweetalert and react-toastify used to show notifications against user actions

Technologies: React, react-router, TailwindCSS, daisyUI, firebase, Sweetalert, react-toastify etc.

Education:

- Bachelor of Science in Computer Science and Engineering (2019 – 2023)
Daffodil International University
CGPA: 3.68 out of 4.00

Languages:

- Bangla (Native)
- English (Comfortable)
- Hindi (Comfortable)
